# JOURNAL WINS AWARD

## TRIBUTE PAID TO JUNIOR CITIZENS OF THE YEAR

**CALGARY** — Lieutenant-Governor J. W. Grant, MacEwan, paid tribute to nine young Albertans, paid tribute to nine young Albertans, a Medley Alberta youth group, and a southern Alberta family who were named Junior Citizens of the Year for 1972.

The Alberta Junior Citizens program recognizes outstanding young people throughout the province who have demonstrated courage, initiative and leadership. It is sponsored by the Alberta Weekly Newspaper Association and the investor-owned electric utility companies in Alberta.

Lieutenant-Governor MacEwan presented the awards during the annual convention of the AWNA at the Calgary Inn. Each of the winners received a certificate from the utility company serving their area, a citation signed by the Lieutenant-Governor and a Canadian Savings Bond.

Six of the nine individuals and one group award were from Calgary Power's service area. Cathy Batta, 16, of Grassland, was named Alberta Citizen for her actions in helping save the lives of three traffic accident victims. Cathy volunteered to escort the three injured persons to hospital after the accident and applied mouth-to-mouth resuscitation to one of the victims during the entire trip. Cathy's prompt action is credited with saving the life of this woman.

Donna Blumhagen, 12, of Bremner was cited for her display of leadership qualities as she assumed responsibility for household chores for her family. Donna cooks, cleans and cares for her three younger sisters and brothers. Still she manages to maintain good marks and attendance at school and earned an athletic crest for sports activities.

Debbie Titworth, 17, of Didsbury was recognized for her quick thinking action in saving four small children from a fire. While babysitting the children, Debbie discovered a fire in one room of the house. She quickly got the children removed from the house and summoned help. Debbie then closed the door to impede the progress of the fire. Her prompt and calm action helped to save the children as well as the house.

Barbara Palm, 17, of Rimby received her award for extensive participation in community activities. Barbara has served as editor of her school paper, as a member of "Reach for the Top" team and on student council. She taught Sunday school, aided with clubs and sang in a teen choir. She has travelled to the United Nations, New York and Toronto as a representative of her community and remains an honour student.

Lona Spearman, 17, of Olds was honored for her outstanding performance despite a severe physical disability. A hard-working student, Lona is on the senior high school girls basketball, volleyball, badminton and track teams. In country contests, she placed second in discus, third in shot put and finished high in the three cross country races. As well, Lona helps with the farm chores and has been a member of the church choir and community band.

Donald Ouellette, 12, of St. Albert rescued victims of a boating accident at Pigeon Lake. Seeing a boat capsize, Donald took two men to safety in his own small aluminum boat, then returned for the others. When one of the men panicked and overturned the boat, Donald remembered water-safety rules and remained calm until help arrived to rescue him and the others.

Back row left to right: Lieutenant Governor J. W. Grant, MacEwan, Debbie Titworth, Lona Spearman, Linda Easthope, Karen Blum, Barbara Palm, Karen Easthope, and M. Williams, Executive vice-president, Cal-

gary Power. Front row left to right: Debbie Easthope, Donna Blumhagen, Shawna Easthope, Glen Easthope, John Easthope, Mark Easthope and Donald Ouellette.

## Figure Skating Club Holds Meeting

The executive of the Crowsnest Pass Figure skating club held their first meeting of the season on Monday, September 18 at the home of Mrs. Louise Zignash to discuss plans for the coming skating sea-

son.

The executive for the year consists of Mrs. L. Batake, president; Mrs. Susan Wakuk, vice-president; Mrs. Pauline Koszegi, treasurer and Mrs. Coleen Wilson, secretary.

The club has hired a new professional for the coming season. She is Miss Gay Uglean of Medicine Hat.

Instructions should be commen-

cing in October, and interested par-

ticipants may phone Mrs. Wilson at 562-296 or Mrs. Batake at 562-2196 for information.

## Judge Finds Mine Firms At Fault In Fatal Slide

**VANCOUVER** — A British Columbia Supreme Court judge found two mining companies equally at fault in failing to provide proper safety measures in the dumping of mine waste which resulted in a fatal slide near Nelson, B.C., in 1968.

Two occupants of a car were killed when thousands of tons of waste rock and overburden slid down a mountainside at the Balmer Ridge open pit coal operation.

The supreme court action resulted when Emil Anderson Construction Ltd. and its subsidiary, Floods Mining and Aggregate Ltd., charged Kaiser Coal Ltd. with negligence. Kaiser filed a counter-claim.

Mr. Justice T. R. Berger's judgment said Kaiser showed no concern for selection of a safe dumping site and that the plaintiff companies, who had the contract to develop the mine and remove the overburden, were equally responsible.

He awarded Anderson judgment for \$101,407.38 but also allowed Kaiser's counterclaim for \$101,943.65.

### No Test

Mr. Justice Berger said no tests were made to determine whether the site was safe for dumping. He added that it was only after the site had been chosen.

This did not justify Kaiser's failure to take precautions against a risk it should have known about, the judge added. He said Kaiser designated the dump site and therefore had a duty to make it safe.

The judge said Anderson also had a duty to ensure safety once the site had been chosen.

## Police Departments Have Access To Computerized Facilities

Assistant Commissioner V. M. Sepala, Commanding Officer "K" Division, Royal Canadian Mounted Police, answered to his query instantaneously that effective September 6, 1972, all RCMP units and all police departments in the province of Alberta will have direct access to the computerized facilities of the Canadian Police Information Centre, which is located in the RCMP headquarters complex in Ottawa, Ontario.

CPIC is an automated central repository for the immediate storage and retrieval of information. The computerized centre contains records placed in the system by all police agencies across Canada. Keyboard devices are connected to the computer centre by high speed transmission circuits which have been installed at the RCMP headquarters in Edmonton, the sub-division headquarters of the RCMP at Calgary and Lethbridge.

These keyboard devices have also been installed at the Edmonton and Calgary city police departments. More of these devices will be installed in the major forces at other strategic locations in the provinces such as Red Deer, Peace River, Grande Prairie, Vegreville, Jasper, St. Paul and Medicine Hat.

What Does This Mean to the Policeman Today? Assistant Commissioner Sepala states that a policeman on patrol

will provide the speedy retrieval of data necessary to today's policeman in coping with today's fast travelling criminal element.

Overall guidelines regulating police use of the computer system are formulated by an advisory committee having Canadian representation. This committee is comprised of senior police officers from all provinces including representatives from the major police forces in Canada.

This joint technological innovation will provide the speedy retrieval

of data necessary to today's policeman in coping with today's fast travelling criminal element.

## ★ THE HOMEMAKER ★

Now that the fall term has arrived the Coleman community library has opened its doors to another year of enjoyable reading. "Read a book" is their solution to your problem of finding something to do with your leisure time. A total of 215 new books (75 adult, 140 juvenile and junior) have been placed on the shelves. The new books have been placed on special shelves for your convenience.

Some of the "best sellers" have been purchased including The Uninvited Max by Max Pemberton, Bear Island by MacLean, Red Lights on the Prairies by Gray, Drivers by Mitchell, Sacred Legends on Sandy Lake Crite by Stevens, Women in the House by Barrett, and many others.

The library was also renovated over the summer and a mauve and yellow interior now provides that relaxing atmosphere to assist you in choosing a book. Remember relax and read a book.

Unit Price Pocket Calculator  
A shopper's best friend in the supermarket is likely to be a consumer cost calculator.

This is a purpose-made aid for comparison food shopping. It is designed to stop the supermarket shopper from getting headaches in that mathematical maze.

The calculator, made of stiff plastic, makes it easy to compare the cost per ounce, pound, can, package and serving of two or more similar items on the shelves.

The calculator works like a slide rule, except it isn't that complicated. It's easy to use and quickly tells the shopper which of two similar products priced differently - two sizes of the same product - is the least expensive.

This gadget can be purchased for \$1.00 from Information Canada, Ottawa K1A 6J9 for 75 cents.

It was designed for the housewife by the Canada Department of Agriculture and you can't beat it for solving simple arithmetic problems until the supermarkets solve them for you by introducing unit pricing.

To Many Child Poisings

Surely the saddest statistic in

volves poisoned children. Either

they're victims of their own natural

curiosity or somebody else's carelessness in the kitchen. Look at

the figure — 30,000 pre-schoolers

poisoned in 1970 by sink powders,

bleaches, aspirins, floor polishes,

wintergreen, garden fertilizers, bug

killers, contraceptive pills, liniment

or turpentine.

The only good news about those

1970 figures is that fewer

children were poisoned than in the

year before.

Governments can educate and

legislate all day long about haz-

ardous products, but only parents

can help their young stay out of

dangerous chemicals and medication

meant for other people.

The Consumer and Corporate

Affairs Department now has legi-

slation working which causes

manufacturers to label many of

the products used in the home ac-

cording to the nature and degree

of hazard when used.

The symbols — and you will see

more of them now — involve a

skull and crossbones, a flame, a

skeletal hand and an explosive

symbol. These are enclosed in

three distinct shapes, an octagon,

diamond and triangle. We have

reached into the schools to edu-

cate youngsters about hazardous

products. With animated charac-

ters we hope to get the children

who can't read. Parents must

help toddlers. Don't leave poisons

lying around — save the children.

## Preventive Social Services

Last Wednesday, I attended the board meeting of the Alberta council on Aging held in Red Deer.

Broadly speaking, the council is a group of people from a wide diversity of backgrounds who as a council are actively engaged in programs of study and action in fields related to the process of aging among citizens of the province.

One of the projects of the council was to establish a Memorial Fund to provide monies that could be awarded yearly for the research, development and training of those working in the field of aging.

Last year, the J. W. D. Buchanan award, named after a late president of the council was awarded

to two people; Mr. Charles Goulding of Edmonton, Alberta, received one of the awards last May for study concerned with the furthering of drop-in centres for senior citizens throughout the province.

The other award went to Mr. L. Dryden of Calgary, Alberta, for studies concerning with elderly patients discharged from mental hospitals are examples of small-scale investigations which would have been of help to the council in its deliberations.

Further work is needed to assess the adequacy of services for the aged and aging, about gaps in such services and about comparisons between the effectiveness of different forms of service delivery have hindered the council in its discussions with the government.

Projects attempting to assess the needs of widows and other "invisibles" elderly Albertans, a survey of training facilities for older unemployed workers, transportation problems and a follow-up study of elderly patients discharged from mental hospitals are examples of small-scale investigations which would have been of help to the council in its deliberations.

Further research involving the collation of existing available research would not only serve a similar purpose, but would aid speakers at conferences and workshops.

This fund could also receive donations for specific purposes, designated by the donor and in consultation with the council, such as the publication of certain material, the production of video or film material, etc.

In order to meet some of the needs of research referred to, a fund for this must be established and the board suggest that the donations "in memoriam" could appropriately be made to mark the passing of a loved friend or relative.

Contributions should be sent to the chairman of the Alberta Council on Aging Memorial Fund committee.

The number of Canadian scholars active in the various fields of gerontological research is extremely small and one of the council's aims has therefore been to stimulate a greater effort in this direction.

The Trudeau Liberals would concentrate new secondary industry in Ontario and Quebec. As usual, A Progressive-Conservative government will develop the whole country. We recognize the unusual industrial capacity of Alberta and of several Alberta towns. A Conservative government means more jobs and growth for Alberta.

The council's direct involvement through the Memorial Fund is intended to encourage empirical investigations which can help the council's own policy formulations, as well as summarizing previous findings. The absence of up-to-

date information about the adequacy of services for the aged and aging, about gaps in such services and about comparisons between the effectiveness of different forms of service delivery have hindered the council in its discussions with the government.

## Horoscope THIS IS YOUR LIFE

By TRENT VARRO

### DON'T PAY TO HAVE YOUR HOROSCOPE READ — READ IT HERE !!!

#### ARIES—March 21 to April 20

There could possibly be some slight disruption in domestic or romantic matters this week. It would be very foolish to let this upset you, as it will be over practically before it starts.

#### TAURUS—April 21 to May 20

An extremely beneficial set of aspects in the zodiac is appearing at this time. Whether it involves money coming in, or a wise investment in money spent will depend on your own personal chart.

#### LIBRA—Sept. 22 to Oct. 22

You might find yourself fidgety and restless at this time, but that's all, as there is every indication that you have much to gain. Love interests especially are to the fore.

#### SCORPIO—Oct. 23 to Nov. 21

This might possibly be an upsetting period, perhaps unlucky period for Scorpio individuals, but other than just plain "bad luck" the general outlook is in your favor. Get your friends to help you to remain calm.

#### GEMINI—May 21 to June 20

You may find this period a little bewildering. Much can be gained

if you are willing to accept things as they are at present and keep your feet on the ground.

#### CANCER—June 21 to July 21

There is not one single planet in your aspect to your sun sign now. Life can be just about what you want to make of it at this period. Much activity, and maybe travel from one place to another is a strong possibility.

#### LEO—July 22 to August 21

The planetary aspects at the present time mark a climax, either

Some tremendous gains are indicated now if they are based on a "quick-turnover" rather than a long range investment. Unless something unusual goes wrong you are fairly certain to gain.

#### AQUARIUS—Jan. 20 to Feb. 18

The next week or so might mean taking a loss of some kind through a foolish gamble. This is not a period to fear, but definitely warns you to "face the facts." Be extra careful in your relationship with those around you.

#### PISCES—Feb. 19 to Mar. 20

The horoscope ahead for the sign Pisces may bring some pretty hard-to-take realities of life that seem harsh. If you handle things in the right manner, this can prove to be of much benefit in the long run.

Mrs. H. Anderson has as her guest, her daughter and son-in-law, Mr. and Mrs. F. Heithen of Eureka, Mont., and also another daughter and son-in-law, Mr. and Mrs. Ray Dompe of Ottawa.

### Senior civil servants

... are often out-of-touch. Sometimes they block reform. One way to change that is to bring in practical people from outside government, as they do in the USA and Japan. Another is the "Request for Proposal" technique, which lets private groups and citizens tackle certain public problems. One of my major goals is to "ventilate" Canada's senior civil service.
